PROFESSIONAL SUMMARY

DevOps Engineer with **3+ years of experience managing AWS cloud-native infrastructure and microservices environments across 9 products**, skilled in **CI/CD automation, Infrastructure as Code (IaC), monitoring & observability, WAF & CDN management, and reliability engineering**, focused on **building scalable, secure, and highly available production systems**.

TECHNICAL SKILLS

Cloud: Microsoft Azure, AWS

Containers and Orchestration: Docker, Kubernetes, Amazon ECS

CI/CD and IaC: Jenkins, Terraform

CDN and WAF: Cloudflare, Akamai

Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana)

Scripting: Bash, Python

EXPERIENCE

Associate Cloud Engineer

Investis Digital (IDX™)

Sep 2024 - Present

Vadodara, Gujarat

- Deployed and managed **9 products** on **Azure and AWS** using **Virtual Machines, Azure App Services, EC2, ECS and EKS**, handling **5M+ hourly requests**.
- Containerized **.NET** applications using **Docker multi-stage builds**, reducing image size and deploying them to **ECS clusters** via **ECR repository** for efficient orchestration.
- Built **CI/CD pipelines** using **Jenkins and Terraform**, resulting in a reduction in infrastructure provisioning time and eliminating manual errors.
- Deployed **Valkey** on **EC2 (self-hosted)** and **AWS ElastiCache** to enhance caching performance.
- Migrated WAF and CDN from **Akamai** to **Cloudflare** for **2500+ sites** with **zero downtime**, improving security, performance, and reducing costs.
- Managed containerized workloads on **Azure Virtual Machines** powering a public-facing platform with **zero downtime** deployments using Nginx.
- Configured **self-hosted ELK stack** from scratch for **log management** and **system observability**.

Software Engineer

Celstream Technology

Jan 2022 - Aug 2024

Bengaluru, Karnataka

- Developed **Python**-based automation to generate **resource utilization reports**, enabling the identification of underutilized AWS assets and contributing to a **12 % reduction in cloud costs**.
- Configured and managed **VPCs, subnets**, and established **peering connections** between different regions.
- Implemented automated ML training pipelines on **AWS** using **Jenkins, Terraform, and AWS Glue and Athena** for data preparation, validation, and artifact management.
- Deployed **Application release** in production and staging environment, **ensuring minimal downtime**.
- Implemented **AWS Backup** for all resource, ensuring complete and automated backup coverage.

EDUCATION

B.E. in Computer Science, G. H. Rasoni College of Engineering and Technology (**GHRCE**), Nagpur
